## PROFILE

Finance professional transitioning into IT with a strong background in financial administration, economics and investment management. Currently pursuing a Masters in IT at Universal Higher Education (UHE) in Melbourne, Australia. Passionate about data analysis, database management, and financial technology solutions. Fluent knowledge in Python, SQL, and business intelligence tools such as Power BI. Seeking an entry-level opportunity in IT, particularly in data administration or related fields.

## WORK EXPERIENCE

2025 - PRESENT

### TELUS INTERNATIONAL — AUSTRALIA Data Analyst

- Evaluated search engine results and queries to assess relevance, accuracy, and user intent across specific local markets and regional contexts.
- Conducted research and evaluation tasks on digital maps to verify routes, locations, and map data accuracy for global users.
- Reviewed audio, news, and social media content to validate facts, detect biases, and ensure information integrity across platforms.
- Delivered clean, annotated datasets to support training, improvement, and localisation of machine learning models for major global clients.
- Performed structured online research following strict project guidelines to investigate, compare, and verify data validity across web sources.

2022 - 2023

### WORLD INVESTORS NETWORK — COLOMBIA (OUTSOURCING) Financial / Accounting Assistant

- Executed buy/sell trades across various financial instruments, monitoring market trends to capitalise on short- and long-term investment opportunities.
- Advised clients on investment strategies, portfolio diversification and market risks, leading to enhanced client satisfaction and portfolio performance.
- Conducted in-depth financial analysis and interpreted economic indicators to support data-driven trading decisions.
- Maintained client relationships, providing timely updates on portfolio performance and adjusting strategies based on market shifts and personal goals.
- Ensured compliance with regulatory standards and internal policies in all advisory and trading activities.

2018 - 2021

### JHOZAN CONTRERAS OBRAS CIVILES S.A.S — COLOMBIA Financial / Accounting Assistant

- Executed timely payments to suppliers and employees, maintaining accurate financial records and ensuring compliance with project timelines.
- Produced monthly and project-based financial reports, providing full accounting documentation for ongoing projects.
- Assisted with environmental regulation compliance for the organisation, supporting reporting tasks to regulatory bodies.
- Collaborated with engineers, project managers and stakeholders to ensure smooth financial operations and reporting accuracy across all departments.

2014 - 2016

### CENPAROV — COLOMBIA Financial Data Manager

- Designed and maintained ETL pipelines to consolidate and prepare financial data for monthly and quarterly reporting.
- Conducted data profiling, anomaly monitoring and variance analysis, helping to identify cost-saving opportunities.
- Managed client relationships, providing timely updates on regional tax obligations and ensuring full compliance with government standards.
- Led analytical reviews of public liabilities, advising management on portfolio performance based on quantitative financial indicators.
- Provided administrative support across departments while implementing process improvements that enhanced reporting efficiency and reduced manual workload.

Spanish *Native*  
English *Professional*

## CERTIFICATES

- Calculation and Interpretation of Financial Indicators
- Financial Analysis
- Business Management
- ISO 9001:2008 Internal Quality Audit
- Safety Inspection with a Management Approach
- Data Analyst

## NON - CERTIFICATE SKILLS

- Blockchain Technology
- Smart Contracts
- Mining Rig & ASIC Configuration

PROJECTS

Resume Engine

PYTHON CLAUDE AI PLAYWRIGHT TKINTER YAML

Built an AI-powered resume automation tool that generates professional PDF and DOCX resumes from a structured YAML profile. Integrated Claude AI for conversational profile updates, LinkedIn data export sync, and a desktop GUI eliminating manual resume maintenance.

[github.com/josecardona1994/resume-engine](https://github.com/josecardona1994/resume-engine)

AegisPay — IoT Network Security Monitor

PYTHON KALI LINUX ARP DETECTION  
NETWORK SECURITY IOT

Developed a real-time network security monitoring tool for IoT payment infrastructure. Implemented ARP spoofing detection, rogue device identification, and automated alerting across a simulated enterprise network topology.

[github.com/josecardona1994/aegispay](https://github.com/josecardona1994/aegispay)

SolarShield — SolarWinds Attack Detection

PYTHON SPLUNK SIEM THREAT DETECTION  
POWERSHELL

Built a detection and response system for SolarWinds-style supply chain attacks. Designed SIEM rules, log analysis pipelines, and forensic indicators to identify malicious backdoor behaviour in enterprise environments.

[github.com/josecardona1994/solarshield](https://github.com/josecardona1994/solarshield)

VP FVG Scalper EA — Algorithmic Trading Bot

MQL5 METATRADER 5 ALGORITHMIC TRADING XAUUSD  
PROP FIRM

Engineered a fully automated Expert Advisor for XAUUSD on MetaTrader 5, implementing Volume Profile and Fair Value Gap strategies with dynamic risk management and prop firm compliance controls.

[github.com/josecardona1994/vp-fvg-scalper](https://github.com/josecardona1994/vp-fvg-scalper)

Secure Bridge — Vulnerability Disclosure Platform

FULL-STACK SECURITY VDP REACT NODE.JS

Co-developed a full-stack Vulnerability Disclosure Platform enabling organisations to receive, triage, and manage security reports from external researchers. Delivered system architecture and live stakeholder presentation.
